

# Working Student (m/f) Production of Charging Infrastructure

## About us

Founded in 2011, ebee was created to develop smart, compact, and affordable electric vehicle charging solutions. We aim to supply cost-effective and easily-accessible public charging solutions that synergize with other city infrastructure. Today, our company is tightly intertwined with the future of city design and the automotive industry. To achieve this, we operate on standards that make our solutions available for everyone on the market and we offer a variety of products that can be configured to provide the greatest flexibility for the customer.

## Requirements:

- Fundamental knowledge of electronics and ideally first experience in assembling electronic components
- Skilled craftsmanship
- Fundamental knowledge in IT such as MS Office and common e-mailing software
- Creativity and motivation to support your coworkers and your working environment

At best you are at the beginning of your studies, because we are looking for a long term cooperation. Ebee will support you actively throughout your studies and we will give you the opportunity in absolving practical semesters, writing your final thesis e.g.

## We offer:

- Flexible timetables and a high degree of responsibility
- Work in a young, dynamic and international team with a culture of open communication and a flat hierarchy
- A creative and dynamic work environment at the EUREF-Campus in Berlin Schöneberg – Europe's eMobility & Green Tech Hotspot

We are happy do receive your letter of application, including CV via [hr@ebeesmarttechnologies.de](mailto:hr@ebeesmarttechnologies.de)
